

Commitment to Accessibility

Blue Coyote Labs, LLC is committed to providing a website that is accessible to the widest possible audience, regardless of technology or ability. We are actively working to increase the accessibility and usability of our systems and in doing so adhere to many of the available standards and guidelines.

This website endeavors to conform to level Double-A of the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.1, and meet compliance standards of Section 508 for publicly funded websites. These guidelines explain how to make web content more accessible for people with disabilities. Conformance with these guidelines will help make the web more user friendly for all people.

This site has been built using code compliant with W3C standards for HTML, CSS and Javascript. The site displays correctly in current browsers and using standards compliant HTML/CSS/JS code means any future browsers will also display it correctly.

Whilst Blue Coyote Labs, LLC and the BlueLEO software system strives to adhere to the accepted guidelines and standards for accessibility and usability, it is not always possible to do so in all areas of the website.

We are continually seeking out solutions that will bring all areas of the site up to the same level of overall web accessibility. In the meantime, should you experience any difficulty in accessing this BlueLEO-powered website, please don't hesitate to contact the developers: accessibility@bluecoyote.io.
